

# QuikTran™

NC CODE TRANSLATION SOFTWARE

QuikTran provides a convenient method of translating numerical control (NC) part files from one format into another. Save countless hours of wasted time re-programming nests by importing pre-existing code created for an old cutting machine and exporting code for the new cutting machine. Even if used for translating code once, when the new machine is installed, QuikTran can immediately pay for itself in programming time savings. In addition, QuikTran will produce accurate code and avoid the errors associated with manual code translation. Also, because QuikTran uses code that already exists in the NC file, errors that can occur while reprogramming in other NC systems are eliminated.

## Standard features

- Works with more than 100 different controller formats
- Quickly translates NC code formats
- Allows creation of custom configuration files
- Provides code preview for original and translated NC code
- Shows view of process, kerf, feed length, rapid length, dimensions, and area of every translated file
- Part files can be converted to a different machine control format
- Part files can be changed from absolute to incremental format
- Part files can be changed from inch to metric
- Part files can be changed from one cutting process to another

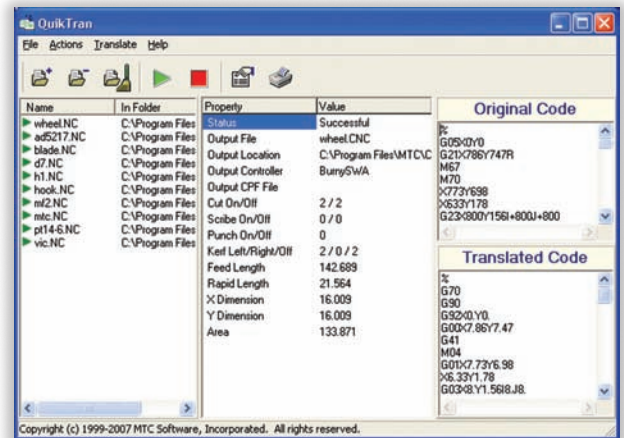

## Detailed summary of the output file can be printed, including the following

- Format (absolute/incremental)
- Precision (normal/extra if supported by control)
- Units (inch/metric)
- Part area
- Feedrate motion length
- Rapid motion length
- X and Y dimensions
- Number of process on and off commands for each process
- Number of kerf commands (left, right, off)

## Commitment to service

MTC Software products are backed by the industry's best technical support, provided via company and channel partner specialists who are available to assist you using telephone, fax, email, and online support sessions. Our dedicated support team will make sure that you are up and running quickly, achieving operational readiness in as little time as possible.

We offer a Software Subscription program which includes one-on-one internet training sessions, unlimited technical support, and access to periodic version and update releases. The subscription program provides a cost effective way to get the most out of your investment in MTC Software.
